

A process for producing dry powders of one or more carotenoids

Abstract

5

The invention relates to a process for producing dry powders of one or more carotenoids by

- 10 a) dispersing one or more carotenoids in an aqueous molecular or colloidal solution of a mixture of lactose and a protective colloid and
- b) converting the dispersion which has formed into a dry powder by removing the water and, where appropriate, additionally
- 15 used solvents and drying, where appropriate in the presence of a coating material,

wherein at least one soybean protein is used as protective colloid in process step a).
